

TMMData

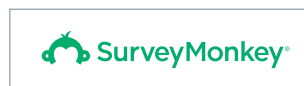

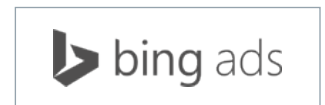

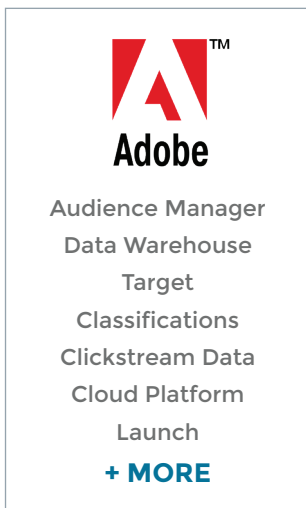

Pre-Built Connectors & Data Integrations

Seamless Flow Between Marketing Data Sources & Destinations

TMMData's Foundation platform provides marketers with data integration and data preparation solutions for seamless access, automated data blending, flexible governance, and direct outputs. With tools to combine internal and external, online and off-line data, TMMData enables comprehensive cross-channel analysis, delivery of personalized digital experiences, and confident campaign evaluation and conversion attribution.

Pre-built connectors make it easy to access customer, product, sales, and supply chain data from across the organization and seamlessly integrate it with critical marketing cloud applications like Salesforce, Facebook, Marketo, Qualtrics, and Bitly. Clean, aggregated data can be automatically loaded into popular analytics and visualization platforms like Adobe Analytics, Tableau, Qlik, and Microsoft Power BI.

SOME OF OUR MOST POPULAR INTEGRATIONS

PRE-BUILT CONNECTORS AND DATA INTEGRATIONS

Commission Junction	iTunes	Qlik	Wrike
ComScore	LinkedIn	Qualtrics	Yahoo Mail
Convergys	Looker	Radian	YouTube
Couchbase	MailChimp	Responsys	

CONNECTING DATA WITH THE FOUNDATION PLATFORM

TMMData's Foundation platform provides quick and easy connections to your on-premise databases, cloud applications, spreadsheets, files, and more.

Your marketing team, and other data users at various technical skill levels, can automate data access and blending processes from sources anywhere in your organization without risking data quality, integrity, or security.

Have unique external, in-house, or legacy data sources? The Foundation platform enables flexible connections to a variety of sources, such as CSV and other flat file formats, marketing agencies and other vendors, internal offline data from call centers, email and chat systems, and interactive voice response (IVR) systems.

If you don't see it here, ask us. If we don't have it, we'll build it.
